

# Amadeus cytric Travel & Expense

Advanced spend management

What if you could drive strategic travel spend with a unified solution?

It's no secret that organisations are increasingly looking for a fully integrated approach to their travel and expense management. With continued growth expected in travel spend worldwide (1), this can have a critical influence on your company performance. Securing cost reductions requires a tight corporate travel policy backed up by a flexible cross-device platform and an automated expense management system.

Amadeus cytric Travel & Expense is an agile, integrated solution to control your corporation travel programme – while simplifying the user experience. Backed by the unparalleled content, technology and expertise of Amadeus, cytric T&E is just what travel and finance managers need to make the leap into optimised travel processes.

### Cost control with efficient policy compliance

Amadeus cytric T&E helps you drive your corporate policy easily: from trip planning to booking, expense reporting, accounting and reimbursement. Your rules apply, with customised features to enable the best purchase decisions.

### Cost control with optimised travel purchase

Start challenging the need to travel itself with our unique **Travel Wizard\***. If the support of a travel agent is needed the booking can be included automatically in the system, providing a consolidated result. With average savings of 12% and 55% on direct travel and indirect travel costs respectively (2), cytric T&E drives you to the best purchase decisions. Unique features like **Perfect Fare Configurator\***, **Grid Pricing\*** and **Cube Channel Technology\*** provide superior

and user-friendly aggregation of availability as well as most appropriate sources and pricing to indicate the best purchase decision. More importantly, with our **Vendor Direct Connect\*** you access the provider's content based on your own requirements.

### Cost control with increased online adoption

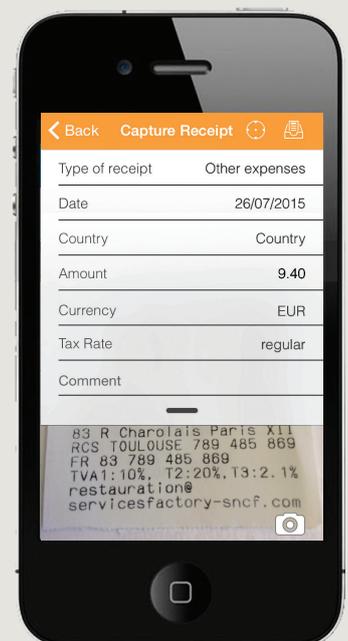

Best company - preferred travel options on flights, hotels, trains, low-cost suppliers or direct providers are available at a glance, with no need to open multiple windows, ensuring easy online adoption. Why waste time searching elsewhere? Travellers can speedbook their recurring flights and hotels in **less than 30 seconds**. A dedicated dashboard just for travel arrangers speeds up booking, including a subsequent view of all related booking data.

### Cost control with seamless end-to-end integration to ensure bottom line savings

With an average cost of €6.05 per report in a fully automated travel and expense management solution compared with €23.48 for a manually processed one (3), the impact on your company's gains is significant. As the trip planning

and credit card data is transferred automatically to the booking and expense applications, the travel management process goes even faster.

Pursue your travel and spend policy through a cross-device workflow

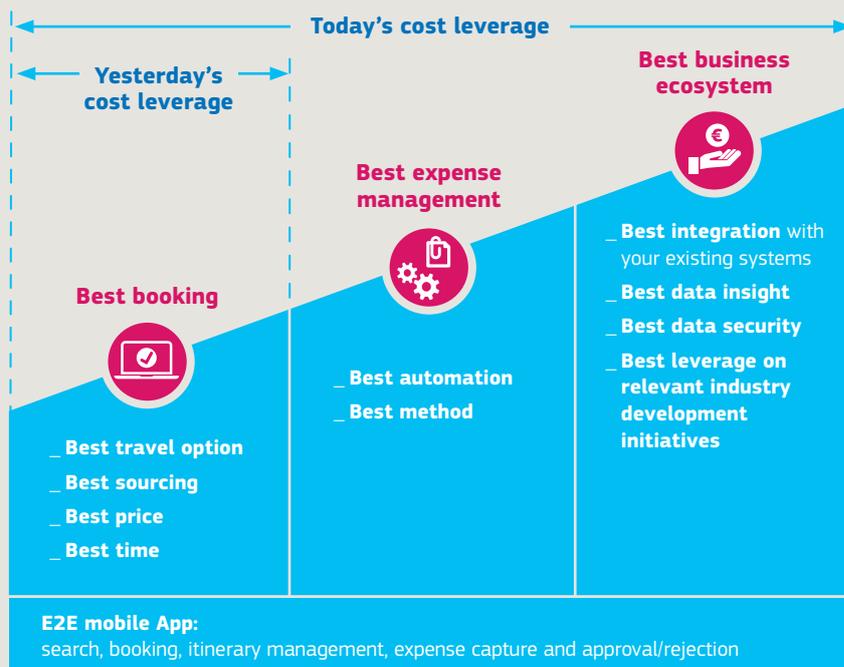

Paper receipts and complicated reimbursements are replaced by increased transparency. The integration of successive steps of the travel programme into one efficient workflow makes it easy to drive corporate policy compliance while facilitating the travellers' adoption. Moreover, the process automation is accompanied by increased employee satisfaction as they get reimbursed quicker.

### ... even on the move

Capturing receipts and submitting trip expenses directly from their mobile device anytime, anywhere is intuitive. This way travellers can focus on their business objectives, rather than on putting their expense reports together. Managers benefit from the same mobility, being able to approve both travel and expense on the move.

*Automation comes with savings at every step: from increasing compliance with corporate and legal policies and standardising expense policies across your business to minimising risks associated with uncontrolled spending and fraud.*

### Avoid risk: choose the right partner for success

In this fast-paced business you need to ensure that your employees keep performing. Businesses may have concerns about changing their systems – fearing the unknown in terms of data security, global expansion and cost control. Choosing Amadeus means opting for a long-term partner to help you shape the future of your business. Amadeus gives you insight and clear direction in both IT and travel technology – backed up with the investment to make it happen.

Amadeus has a **proven track record** in terms of data hosting, security and financial stability: Amadeus cytric Travel & Expense data management site is hosted in Germany with strict compliance standards, PCI DSS certified, with all sensitive personal and corporate data stored on cytric servers and not communicated from the mobile App.

With strong financial performance, Amadeus is regularly rated as #1 R&D investor (in the travel and tourism industry in Europe).

- **3.5 billion Euros** invested in R&D since 2004
- **568 million Euros** invested in R&D in 2014
- **16.6%** of total revenue invested in R&D in 2014
- **17** R&D centres
- **13,000** employees
- **219** markets

Amadeus is at the heart of the global travel industry. Our people, our technology and our innovation are dedicated to working with our customers and partners to shape the future of travel.

- We help them connect to the travel ecosystem.
- We help them serve the traveller.
- We help them manage their travel business.

**Together, let's shape the future of travel.**
